

ENVIRONMENTAL POLICY

Through our work in the field of thermoplastic elastomers (TPE) we will contribute to decrease environmental stress.

Strategy

- We will through product development together with our customers contribute to reach the highest safety possible for people and the environment.
- Working with our suppliers, we will choose raw materials and additives with as low an impact on the environment as possible.
- We will choose production equipment, logistical and packaging solutions which have as low an impact on the environment and resources as possible.
- We will comply with all legal environmental requirements and regulations.
